

**An investment in
environmental protection.**

Sustainability

Based in Switzerland and established in 1928, Katadyn is a world leader in the design and manufacturing of filtration products—approved as safe and effective by some of the world’s leading authorities on water purification.

The FRX02 cartridge, exclusive to our Perrin & Rowe® Filtration solution, uses a composition of Katadyn ceramic, anti-bacteria silver, carbon block and Zeolite. This one small unit has the capacity to reduce a variety of water contaminants including pathogenic bacteria, organics, chlorine, lead and mercury.

- Ceramic – Particulate reduction
- Silver – Kills bacteria
- Carbon – Chemical reduction
- Zeolite – Heavy metal reduction
- ISO 9001 accredited
- Replacement filter for U.1812 filter system
- Also for use with Country Kitchen filter faucets A1435 and A1635
- Complies to NSF61, sec. 9 and meets NSF42 and 53 for chlorine and lead reduction
- Filters to 0.2 microns
- Reduces Cryptosporidium parvum, E. Coli, Salmonella, and other bacteria
- Made of Ceramic, Silver, Carbon and Zeolite
- Reduces particulates, improves taste and reduces all heavy metals
- Reduces Pathogenic bacteria, cysts, turbidity, organics, foul tastes and odor
- Also reduces insecticides, herbicides and hydrocarbons
- 1,000 gallon capacity

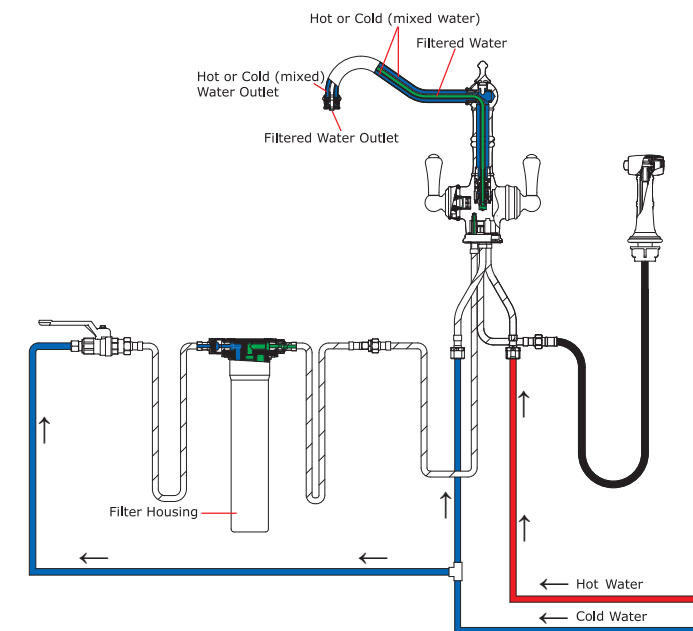

According to the Earth Policy Institute (EPI), 57 billion gallons of bottled water are consumed globally each year — 8.8 billion in the U.S. alone. Approximately 2.7 million tons of plastic bottles end up in landfills. The Perrin & Rowe® Filtration solution solves this problem — by eliminating the need to purchase bottled water and dispose of plastic. It’s one of the smartest investments you can make in protecting our planet.

- Each filter produces 1,000 gallons of clean filtered water.
- This saves over 7,576 plastic bottles from ending up in landfills.
- And considering the price of bottled water, one filter can save you over \$10,000. (Based on single bottles purchased at \$1.39 per 16.9oz/500ml plastic bottle.)

Fresh, filtered water is delivered via a separate, hidden waterway inside the faucet.

**Fresh, filtered water
every time you turn
on the faucet.**

**Great drinking water is
always on tap.**

- Hot, cold and filtered water from a single faucet
- Dedicated filtered waterway. Tap water and filtered water never mix
- Faucet and filter sold separately or as a kit
- Easy to install and maintain
- Environmentally friendly system
- Cost effective, fail-safe system
- Broad filter performance
- Supplier integrity — limited lifetime warranty
- Variety of models and finishes
- Renowned ROHL customer service
- Replacement filter cartridges available at ROHL kitchen and bath dealers or www.rohlhome.com

ROHL
Authentic Luxury for Kitchen and Bath®

ROHL's Perrin & Rowe® Filtration solution is the world's first faucet that delivers fresh, filtered water with patented three-way technology. Produced in the UK by Perrin & Rowe®—the same company who produces our distinguished Perrin & Rowe® Kitchen & Bath Collections—it provides hot, cold and filtered water from a single faucet. Made from the highest quality materials, our unique Perrin & Rowe® Filtration is available in a variety of models and finishes to suit your style. Filtered water saves you money and protects the environment.

Perrin & Rowe® Filtration
Featuring “Triflow® Technology”

In the same way that ROHL advanced kitchens in the 1980s by introducing the Pull-Out faucet, the Perrin & Rowe® Filtration represents a major paradigm shift in the way designers and consumers think about filtered water. As the desire for clean, healthy, filtered water continues to increase, people are seeking out alternative options. Our Perrin & Rowe® Filtration provides an innovative system that eliminates a separate filter faucet, has a clean installation, and includes an optional sidespray—providing beauty and functionality in one space-saving design.

U.1293LS

Contemporary Design

It's easier than ever to get fresh, filtered water in style. “Triflow® Technology” is now available in the sleek and luxurious Perrin & Rowe® faucets—featuring dedicated, filtered waterways that prevent purified water from mixing with unfiltered water. Easy to install and maintain, with simple filter replacement, these faucets are as practical as they are elegant.

Easy to install and maintain, with simple filter replacement, these faucets are as practical as they are elegant.

U.1570LS

Traditional Styling

The fashionable, Traditional two-lever kitchen faucet is a handsome addition to any home. The patented “Triflow® Technology” ensures fresh, filtered water every time you turn on the faucet.

The compact ceramic filter removes chlorine and other contaminants such as lead and mercury. So you'll always have clean water for drinking, cooking and even brewing coffee or tea.

U.1370LS

Lavatory Faucet

For convenience in a bathroom, ROHL offers a Perrin & Rowe® Filtration Lavatory Faucet. As handsome as it is practical, this

faucet allows you the freedom to drink, brush and rinse with fresh, filtered water every day. The ROHL Perrin & Rowe® Filtration featuring “Triflow® Technology” is the functional, stylish answer for obtaining healthy, filtered water without compromise.
